

Gulf Power | Renewables

Gulf Power | Landfill Gas-to-Energy

Has kept 3.96 billion cubic feet of methane gas from entering the atmosphere.

Gulf Power | Wind Energy

Enough electricity to power 131,842 homes.

Gulf Power | Solar Energy

Capable of reducing emissions by 3.5 million tons over the life of the project; equivalent to removing 670,700 cars from the road for one year.

Gulf Power is a leader in renewable energy and has invested \$1.9 billion in pioneering clean air systems, which has contributed to a 50 percent reduction of carbon emissions over the past decade.

Renewables makes up 11 percent of Gulf Power's energy generation
